INSPECTION NOTICE April 29, 2025

CMC CLUTCH™ by HARKEN™
Inspection Required

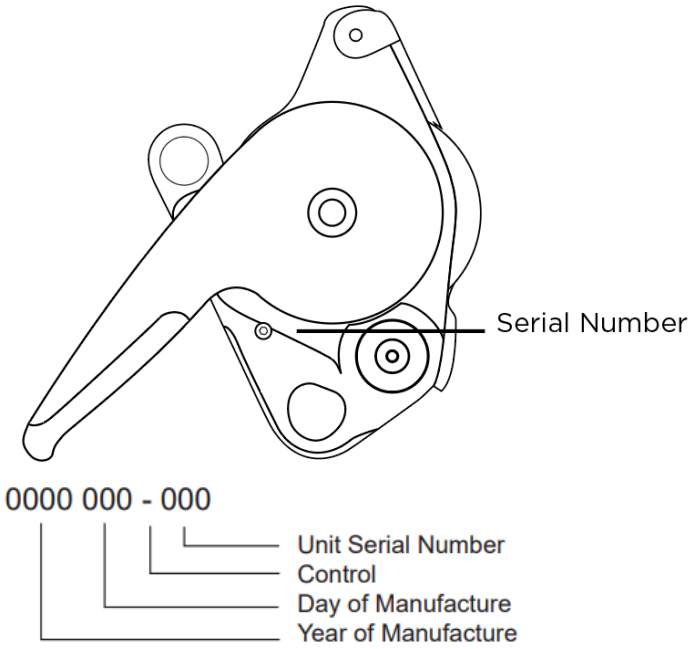

Part Number: 335011-01 & 335013-01
Serial Number: 2024 324 - 001 through 2025 100 - 999
Manufactured: November 19, 2024 through April 10, 2025

CMC and Harken are issuing a Product Inspection Notice for CLUTCH units manufactured November 19, 2024 through April 10, 2025.

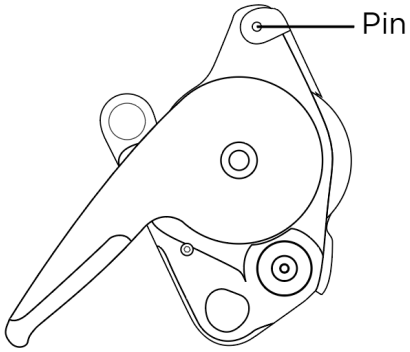

We have identified one 11 mm CLUTCH unit that has shipped to a customer with a loose rivet pin. As a precautionary measure, we are issuing this Product Inspection Notice for 11 mm and 13 mm CLUTCH units (Product Numbers: 335011-01 & 335013-01) with serial numbers 2024 324 - 001 through 2025 100 - 999.

If you have a CLUTCH, please immediately inspect your device and confirm that the rivet pin is installed and secured using the inspection steps below:

1. Verify the serial number on the CLUTCH, see image below.

2. **Inspection Procedure:** On the back side of the CLUTCH, inspect the pin that is fully secured. The pin should have a formed head and be immobile. Refer to the images below for specific examples of passing and failing inspections.

PASS

FAIL

3. If your CLUTCH does not pass inspection or if you have any questions, please complete this form. This form will allow us to better assist you with inspections and repairs. We are available to review photos, conduct calls, or otherwise assist with this process. We will provide shipping labels for the return and repair of affected units free of charge.

4. You may resume using your CLUTCH once the inspection is complete and the product passes your inspection per the Product Inspection Notice, or it has been sent back to CMC for replacement.

As a reminder, all CLUTCH units should be inspected and function tested before/after use and yearly in accordance with the User Manual.

Thank you for your continued support and trust!
